

CASSETTE TOOL STORAGE

KB SECURE SOLUTIONS

KB SECURE SOLUTIONS

Smart & Heavy Tool Storage for demanding environments like workshops & industries

Do you feel the need to update your storage solution to optimize both space & efficiency?

When designing a modern industrial workplace, there are many aspects to consider & strive for

The workplace should be planned & create opportunities for higher safety,
better ergonomics & increased profitability

In our range you will find several flexible solutions to achieve this

**The latest addition is our powerful compact compartment that creates a
smart & flexible storage space for tools & other gear**

The perfect fit for the industrial workplace

The difference between our floor standing storage solutions:

In our range of storage solutions for tools, you will find everything from workshop cabinets & tool trolleys to combination racks for lighter loads & compact compartments that can withstand heavier loads

The combination racks & compact compartments are based on the same type of solution:
A floor standing construction with extendable cassettes for convenient storage of tools around the workstation

The advantage with this type of storage compared to a cabinet or trolley is that
every tool has its own place, they are clearly visible & easy to reach during work

At the same time you can choose to fold in a cassette with tools that are not current at a time or vice versa

Powerful tool suspension with compact compartments:

What distinguishes the constructions apart is the load capacity

While our combination racks have a load capacity of 400 kg
our compact compartments can be loaded with as much as 1200 kg

The compact compartments are thus our most powerful model of tool storage so far
The construction, load capacity & design creates an optimal storage solution
for demanding environments such as workshops & industries

Equip our compact compartment with extra cassettes, perforated side panel or a shelf cassette

The compact compartment is ordered as a standard either including
three double sided cassettes or including three double sided cassettes & three external panels

The cassettes have a maximum load of 170 kg, are equipped with ball-bearing trolleys
for easy handling & are fully extendable

The entire surface can therefore be used for storage

Our compact compartments can be supplemented with additional cassettes,
perforated panels for external suspension or a shelf cassette

New accessory: Shelf Cassette:

Consists of four drawers that can be placed at any height with 150 mm intervals
A smart solution for smaller parts that cannot be hung on the perforated surface
Also useful for bottles, cans & other supplies

Maximum load of the shelf cassette if 200 kg distributed weight

Compact Compartment with 3 Double Cassettes & 3 Exterior Panels

Article number: 5-583-100

Gross weight: 265 kg

Width: 990 mm

Depth: 1875 mm

Height: 2180 mm

Load capacity: 1200 kg

Our most powerful model of tool suspension that can handle a total load of 1200 kg

The cassettes are fully extendable so it is possible to use the entire surface

The compact compartment consists of three double-sided panels which are movable sideways with cc18 mm for optimal use

Exterior panels for free-standing placement. Total hanging area on this model is 16.2 m². (1.8 m² / panel).

Maximum load per cassette is 170 kg. Delivered unassembled.
